

'THE BETTER GRASS SYSTEM' v CONVENTIONAL SYSTEM

Many farmers use:- 20-10-10 and or 25-5-5

EXAMPLE: Early bite: 25-5-5 at 2 bags to supply 50-10-10

Then later: Top up with 20-10-10 at 2 bags to supply 40-20-20

Total applied: N P K
90-30-30

or use '**THE BETTER GRASS SYSTEM**'

		<u>Unit Rate</u>
Early bite:	'Nitro Chalk' at 1½ bags to supply	N 40 + Calcium
Top up:	'Nitro Chalk' at 1½ bags to supply	40 + Calcium
Plus :	'Better Grass' Fertiliser at 200 kg/ha (1.6 bags/acre) to supply (see below)	

Total applied:

Units											Grams		
Ca	N	P ₂ O ₅	K ₂ O	MgO	Na ₂ O	SO ₃	Mn	B	Cu	Zn	+ (Se Co I)		
20	80	1	8	8	65	9	.3	.3	.2	.3	(65 150 50)		

Better Grass Fertiliser contains **MORE** beneficial nutrients all in a seaweed base with soil conditioners and includes selenium, cobalt, iodine and copper etc plus sodium to improve palatability.

NOTE: *includes biological activators to release soil 'locked up' phosphates.*

**There is no doubt which will grow BETTER GRASS
IT IS GUARANTEED – AND IT COSTS LESS!**

Results show:

IMPROVED GROWTH RATES

HIGH QUALITY GRASS

IMPROVED CONCEPTION RATES

MORE CLOWERS

IMPROVED STOCK HEALTH

LESS NITROGEN REQUIRED

HIGHER PALATABILITY

IMPROVED SOIL BIOLOGY
