

# APPLICATION RATES of BETTER GRASS FERTILISER

<b>General Grazing</b>	Apply 200 kg/ha	1.6 bags per acre
<b>Silage Ground</b>	Apply 250 kg/ha	2.0 bags per acre
<b>After cut or Autumn top up</b>	Apply 100 kg/ha	0.8 bags per acre

**250 kg/ha of 'Better Grass' fertiliser will supply:**

Kilograms/Hectare										Grams/ Hectare		
Ca	P <sub>2</sub> O <sub>5</sub>	K <sub>2</sub> O	MgO	Na <sub>2</sub> O	S <sub>0</sub> <sub>3</sub>	Mn	B	Cu	Zn	Se	Co	I
20	1	8	43	65	9	0.3	0.3	0.2	0.3	65	150	50

All this plus more. *Better Grass* also contains biological activators that will release 'locked-up' phosphate — all in a seaweed base with soil conditioners that will reduce soil compaction and improve depth of rooting.

Use less (if any) nitrogen with '*The Better Grass System*' — the trace elements and biological activators help to increase nitrogen fixing from soil.

**IF** you do need to use nitrogen, then we prefer you to use *Nitro Chalk* — please ask for availability.
