Mr. Williams of Abergele – Farms 270 acres with 800 Lleyn ewes and 40 sucklers with followers

"CAN is really working – 1.5 bags per acre and the grass has just kept on growing; I know it has been a good year for grass, but this is much better than I expected.

"All stock is grazing well. When a big bale used to be put into the field, the cows would crowd round and eat it all. Now they have a little nibble, but then ignore it – they prefer the grass".

*"Cattle and sheep are really going after the salt blocks!! Wasn't like that last year. Cows have been licking the spreader of the **Better Grass** when it's been left in the field.*

*They just love the **Better Grass**"*
